

SKY ARMOUR

**FALL
PROTECTION**
X-LITE SERIES

SKY ARMOUR

The Sky Armour range of products was designed and engineered with lightweight comfort, function, and all-rounded protection in mind. Backed by years of expertise and research in fall protection, the X-lite series of fall protection aims to bring superior protection without the weight. The use of quality materials and excellent finishing makes Sky Armour's fall protection products a cut above the rest.

Soar freely. Soar with Sky Armour.

X-LITE

TWIN SHOCK ABSORBING LANYARD

1202

The X-Lite Lanyard features a lightweight bungee cord that is designed to protect you from trips and entanglements from your lanyard. Thoughtfully designed, it features:

- Auto-lock lightweight aluminium carabiner on one end ensures that you're always secure and locked-in
- Designed to expand and contract (1.8m-1.45m) to accommodate the user's movements
- The twin aluminium scaffold hooks provide for lightweight and ease, reducing fatigue on the user
- The bungee cord allows for expansion and contraction, to ensure it is always neat and tidy, preventing it from becoming a trip hazard for the user
- Average fall arresting forces limited to 900lbs (4 kN)

COLOUR	RED & GRAY
DIMENSIONS	1.8m
WEIGHT	1.12kg
WEIGHT CAPACITY	100kg
STANDARDS	EN 355 (2002)

SINGLE DROP TOOL LANYARD WITH CARABINER

1601

The Sky Armour Tool Lanyard ensures secure transportation of tools during work so that users stay safe and productive while working at heights.

It is incredibly lightweight and certified to carry tools up to 10kg in combined weight. The Self-Locking Carabiner requires double actions to open, ensuring a secure connection. The risk of injuries from dropped tools is greatly reduced with the use of this tool lanyard. The lanyard body is engineered to provide superior shock absorption, slowing the tool gradually should a drop occur.

COLOUR	RED & BLACK	WEIGHT	98g	STANDARDS	ANSI/ISEA 121-2018
DIMENSIONS	STRETCHED LENGTH: 120cm	WEIGHT CAPACITY	12kg		

TRAUMA STRAP

1551

The Sky Armour Trauma Straps are an essential item that anyone working at height should be equipped with. These straps help relieve suspension trauma also known as Orthostatic Intolerance, which can happen in the event of a fall. It allows the user, who is suspended, to stand in up in their harness after a fall, relieving the pressure around the top of the legs.

Sky Armour Trauma Straps attach to almost any harness and have a compact and lightweight form that stays out of the way while working.

STEPS TO USING SKY ARMOUR SUSPENSION TRAUMA STRAPS

- 1 Un-zip the pouches fitted on both sides of the harness
- 2 Hold the 2 straps together
- 3 Connect the straps with each other making a loop with the help of easy to use buckle
- 4 Put your feet into the loop
- 5 Stand onto the loop, so that the thigh straps are free to move
- 6 Adjust the sit strap towards the front to release pressure and move into a seated posture.

COLOUR	BLACK	WEIGHT	140g (one pair)
DIMENSIONS	UNIVERSAL	WEIGHT CAPACITY	100kg
